

**A METHOD OF UPDATING PROGRAM IN STORED CONTROL PROGRAM UNIT
AND A STORED CONTROL PROGRAM UNIT**

ABSTRACT OF THE DISCLOSURE

5 The present invention relates generally to the updating of control programs
using the Internet. More particularly techniques are provided for the automatic and safe
updating of a control program in a stored control program unit of a computer system. A
specific embodiment provides security and reduces the cost of updating a control program by
first, executing the instruction to update the control program using a first connection, for
example a public telephone line, and then using a second connection via the Internet to
10 download the update to the control program.
